

Sreesanth S Warriar

Kerala, India | +91 80757 64 822 | sreesanthswarrier@gmail.com | linkedin.com/in/sreesanth-s-w | github.com/notstr0y

Third-year Computer Science and Engineering student at Vidya Academy of Science and Technology, Thrissur. I build things to learn — mostly in C, mostly close to the hardware. In my Computer Architecture lab, I wrote a stack-based RPN calculator in RISC-V assembly, working through stack design, register use, and validation against a C reference.

I also like poking at things outside my usual stack. Currently building Verdict, a Python CLI tool (WIP) where AI agents debate a topic under configurable rules — mostly to explore structured reasoning outside embedded systems.

Deep in embedded systems, algorithms, and low-level programming right now, and always learning by building. Open to connecting with anyone working on similar things — or talking through a weird idea.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

CGPA: 8.82 / 10.00

Vidya Academy of Science & Technology | Affiliated to APJ Abdul Kalam Technological University (KTU)

Expected Graduation: May 2028

- Coursework: Data Structures & Algorithms, Computer Organisation & Architecture, Theory of Computation, Digital Logic Design, Operating Systems, Database Management Systems

Higher Secondary Education (Class XII), CBSE

Percentage: 88.6%

Paramekkavu Vidya Mandir, Thrissur, Kerala | Central Board of Secondary Education (CBSE)

Completed: May 2024

- Subjects: English Core, Mathematics, Physics, Chemistry, Informatics Practices, Work Experience, Health & Physical Education, General Studies

PROJECTS

rpn-calculator-riscv-using-ripes | RISC-V Assembly, C, Ripes

2026

- Built a stack-based RPN (Reverse Polish Notation) calculator in RISC-V assembly as a Computer Organization course project
- Implemented push/pop stack operations manually using RISC-V registers and memory; handled +, -, *, / operators
- Wrote a parallel C implementation for logic validation and cross-verification of assembly output
- Simulated and debugged the full program using the Ripes RISC-V visual pipeline simulator

suko | C, Make

2026

- Developed a command-line Sudoku puzzle solver in C using a recursive backtracking algorithm
- Implemented constraint checking across rows, columns, and 3x3 boxes with clean modular separation across board.c and solver.c
- Used conventional commits, semantic versioning, and GitHub Releases via the gh CLI for structured project management

verdict | Python, CLI Development, LLM Orchestration, Multi-agent Systems, Prompt Engineering (In Progress)

2026 - Present

- Building a Python CLI application where two AI teams debate a topic under host-configurable debate rules
- Tracks each side's stance after every round, surfacing not just who argued better but whether any side's position changed and why
- Runs entirely on free and local models; exports the full debate as a structured research report on completion

TECHNICAL SKILLS

Languages: C, Lua, Python, JavaScript, Java, RISC-V Assembly

Databases: SQLite

Developer Tools: Git, Neovim (NvChad), GDB, Bash, tmux, PlatformIO, Docker

Libraries & Frameworks: FastAPI, Streamlit, scikit-learn, React, python-can

Concepts: Embedded Systems, Computer Organisation & Architecture, Data Structures & Algorithms, Operating Systems, Digital Logic Design

SOFT SKILLS

Leadership, Team Collaboration, Self-Directed Learning, Problem Solving, Analytical Thinking, Attention to Detail, Technical Communication, Time Management, Initiative, Adaptability, Project Management, Written Documentation

ACTIVITIES

MuLearn VAST

Vidya Academy of Science and Technology

Technical Team Member

2025 – Present

- Worked on various technical and creative activities for MuLearn VAST, the college's MuLearn club chapter, contributing to front-end and web development.

UST SIGHT 2.0 Hackathon – Shortlisted, First Stage

2025

CERTIFICATIONS

Indeeptech | Python for Data Science – 5-Day Workshop

June 2025

Oracle | Java Foundations Certification

2025

Vidya Academy of Science and Technology | Python 3.4.3 (Spoken Tutorial Project, IIT Bombay)

February 2025

Udemy | Python Mastery: The Complete Web Programming Course (Knowledge Nest)

June 8, 2025

LANGUAGES

Malayalam, English

INTERESTS

Building hands-on technical projects, learning through practical application, acquiring new skills as required by a project, and exploring emerging technologies.

KEYWORDS

C, Python, Java, JavaScript, RISC-V Assembly, Embedded Systems, Computer Organization and Architecture, Data Structures and Algorithms, Operating Systems, Digital Logic Design, Database Management Systems, Git, GitHub, React, Machine Learning, Web Development, Project Management
